CONTENTS

No. 1 (JANUARY, 1935)

Original Articles: PAGE

89. Seasonal Variation of the Percentage Butterfat Content of Milk. An Examination of the Results of Certain Individual Cow Tests. C. D. OXLEY 1

90. Investigations on the Milk of a Typical Herd of Shorthorn Cows. II. J. GOLDING, J. MACKINTOSH and E. C. V. MATTICK 6

91. A Statistical Examination of the Interrelationship and Variability of Plate Count, Presumptive Coliform Content and Keeping Quality of Raw Milk. H. BARKWORTH . 26

92. An Aerobic Acid-fast *Actinomyces* in Cow's Milk Due to an Udder Infection. J. D. ALLAN GRAY 49

93. On the Detection of Added Water in Milk. BENJAMIN DAVIES 56

94. A Study of the Titratable Acidity of Milk. I. The Influence of the Various Milk Buffers on the Titration Curves of Fresh and Sour Milk. W. J. WILEY 72

95. A Study of the Titratable Acidity of Milk. II. The "Buffer Curves" of Milk. W. J. WILEY 86

96. The Neutralisation of Cream for Butter-making. W. J. WILEY 91

Biennial Reviews of the Progress of Dairy Science:

Section F. Milk-borne Diseases. W. SCOTT 103

No. 2 (May 1935)

Original Articles: PAGE

97. A Study of Progress of Lactation in Relation to the Milk Yield and the Butterfat Percentage of Milk Produced by Cows of Shorthorn Type. C. D. Oxley 113

98. The Use of Special Litmus Milk Media for the Diagnostic Culture of Lactic Acid Bacteria. J. G. Davis . . . 121

99. The Effect of the Reaction (pH) of Milk on the Destruction of Micro-organisms by Heat. A. T. R. Mattick and A. A. Nichols 125

100. The Plate Count of Milk. Experimental Errors in the Examination of I, (*a*) Different Portions of the Same Sample by the Same Person, (*b*) Different Portions of the Same Sample by Two Different Persons in one Laboratory; and II, Different Portions of the Same Milk by Ten Persons in Ten Different Laboratories. A. T. R. Mattick, J. McClemont and J. O. Irwin 130

101. The Occurrence of Coliform Organisms in Cream and their Effect upon Cream Quality. E. G. Pont 148

102. Studies on the Mycological Problems of Dairying. I. The Surface Moulding of Butter. T. R. Vernon 154

103. Studies on the Mycological Problems of Dairying. II. The Internal and Subsurface Discolorations of Butter. T. R. Vernon 168

104. Studies in Cheddar Cheese. IV. Observations on the Lactic Acid Flora of Cheddar Cheese made from Clean Milk. J. G. Davis 175

105. The Phosphatase Test for Pasteurised Milk. H. D. Kay and W. R. Graham, Jun. 191

106. The Rôle of Rennet in the Ripening of Cheddar Cheese. I. R. Sherwood 204

PAGE

107. Studies on the Chemistry of Cheddar Cheese Making. I. The Mineral Content of Cheese and Whey. F. H. McDowall and R. M. Dolby 218

108. Studies on the Chemistry of Cheddar Cheese Making. II. The Buffer Capacity of Wheys. R. M. Dolby and F. H. McDowall 235

109. Studies on the Chemistry of Cheddar Cheese Making. III. The Conversion of Lactose into Lactic Acid by Starter Cultures. F. H. McDowall and R. M. Dolby . . 243

Biennial Reviews of the Progress of Dairy Science:

Section A. Physiology of Dairy Cattle 252

I. Reproduction and Lactation. J. H. Blackwood . 252

II. Nutrition. S. Morris 260

III. Genetics. A. D. Buchanan Smith 272

No. 3 (September, 1935)

Original Articles:

110. The influence of High Environmental Temperature on the Secretion and Composition of Milk. A Preliminary Note. S. Bartlett 283

111. The Nutritive Value of Proteins for Maintenance. S. Morris and N. C. Wright 289

112. Feeding Butterfat to Dairy Cows. A. C. M'Candlish and J. P. Struthers 303

113. The Yield and Composition of the Milk of the Ewe. W. Godden and C. A. Puddy 307

114. The Rate of Milking by Machine. A. S. Foot . . 313

115. Factors affecting Milk and Butterfat Secretion. I. Variations in Fat Weight, Fat Percentage and the Amount of Fat in the Milk Required to make a Given Weight of Butter. E. O. Whetham and J. Hammond . . . 320

116. Factors affecting Milk and Butterfat Secretion. II. The Colour of the Butterfat. E. O. Whetham and J. Hammond 340

PAGE

117. An Unusual Variation in the Butterfat Content of Milk. K. HARTLEY and D. W. H. BAKER 353

118. Investigations on the Milk of a Typical Herd of Shorthorn Cows. III. Nitrogen Distribution, Chloride, Lactose, Copper and Iron Content over a Period of Two Years. W. L. DAVIES 363

119. Mastitis Streptococci in Bulk Milk. E. J. PULLINGER . 369

120. The Types of Coliform Bacteria in Bovine Faeces. J. F. MALCOLM 383

121. Diacetyl in Cold-Stored Butters. C. R. BARNICOAT . . 397

122. The Function of Pepsin and Rennet in the Ripening of Cheddar Cheese. I. R. SHERWOOD 407

Biennial Reviews of the Progress of Dairy Science:

Section B. Bacteriology and Mycology Applied to Dairying. A. T. R. MATTICK, E. R. HISCOX and J. G. DAVIS . . 422
